## *for Healthcare Ops Executive*

Positioning in 15-second, one-minute and five-minute versions

Level 1: Top value 15 sec.

***Acme offers a direct path to improved patient care by ensuring more reliable, secure information.***

+ Level 2: 2nd level value 1 min.

| Healthcare is a core focus for Acme | Reliability and performance give doctors on-demand data access | Transparent HIPAA-compliant encryption protects patient records | Acme onboard memory reduces strains on servers to cut costs | Management tools reduce network administration |
|---|---|---|---|---|

+ Level 3: Product details 5 min.

- Healthcare is a CORE market for us
- We tune our company & products to offer high value in healthcare
- Top hospitals and healthcare insurers do their most critical work using Acme

- Higher MTBF
- No re-boot on firmware upgrades
- Best multi-channel performance
- Lower operating temperature reduces A/C expense
- 24x7 support

- Drop in solution
- Transparent to users
- Integrates with key management tools you already have (KMIP compliant)
- Manage multiple locations
- 1/5 to 1/10 the cost of other solutions

- Lower RAM utilization means more virtual machines per server

- Tools are “enterprise-ready”—far more efficient for large operations
- Enable quick resolution of performance and availability issues
